CIVIL INFRASTRUCTURE DEVELOPMENT

JIL provides comprehensive site engineering services through design interpretation, site setting out and construction.

JIL has developed significant technical knowledge from an extensive list of residential, mixed-use, industrial, educational, and municipal projects.

Our expertise in a diverse range of civil/structural engineering services; roads, bridges, and building construction. Our team of engineers, technician, business executives and workforce give us the opportunity to work on multiple aspects of very complicated projects.

BUILDING INFRASTRUCTURE

With more than 20 years building experience in the Construction Industry, our building infrastructural team offers clients comprehensive services that include building construction of residential and commercial buildings, renovations, Pile foundation, alterations and real estate development. We customize our services to fit each client's budget and unique requirements. Our division has longstanding history and established a reputation for providing quality, reliable and sustainable service and delivery, regularly exceeding client expectations.

PROJECT MANAGEMENT SERVICES

Our project management services provide you with comprehensive supervision, inspection and commissioning services for all types of projects - no matter the size or location. As a leading company in project management, we offer you extensive experience in all aspects of construction as a result, we can help you reduce technical risks, prevent construction errors, control budgets and effectively keep your construction project within the planned schedule by proper project planning.

SAFETY, SECURITY AND ENVIRONMENT:

We are committed to achieving an injury free work place and conduct business in accordance to the local and global environment laws to achieve objectives of sustainable development

At JIL we believe that:

- Our greatest asset is our people
- All accidents can be prevented
- Our working environment should be safe
